PassagePoint Module
Employee Pre-Entry Health Survey

**PassagePoint** ›› **Powered By STOPware**

Part No. MG-EM

Automatically Administer Daily Health Screening Survey to Employees

PassagePoint's new Employee Pre-Entry Health Survey Module is designed to easily administer an electronic Daily COVID-19 Screening Questionnaire to Employees as required by many State Health Departments based on guidance from the Centers for Disease Control & Prevention.

Employees complete the Daily Questionnaire in the privacy of their own home and their responses will determine whether workplace entry for the day will be approved or denied.

These precautionary measures are quickly becoming the new norm to protect employees in the workplace!

Features & Benefits

- Contactless attestation solution using Employees mobile device
- Mobile-friendly so Employees can enable their access cards from phone browser
- Ability to have user accounts configured in PassagePoint manually or through LDAP/AD
- Ability to integrate with Access Control* to activate Employee badge for clearance if answers result in a Pass status.
- Access credential will remain inactive if Employee fails health questionnaire to ensure safety
- Health questions are configurable to accommodate Customer-specific policies
- Compliance data available in audit reports for liability & risk management
- Ability to automatically Quarantine Employee for specified # of days if they fail health screening questions

Product Specifications
