Part No. MA-PT

## Use Your Visitor Management System to Streamline Your Package Deliveries

In addition to tracking people, deliveries and property, PassagePoint Visitor Management System can now track packages to streamline the process of receiving and delivering packages within your facility.

STOPware's PassagePoint Package Tracking Module allows pending deliveries to be scheduled and tracked before, during and after arrival.

Features & Benefits

- Generate unique package tracking label with barcode

- Send personalized delivery notifications and reminders via SMTP or email

- Separate notifications to package Recipient for Pending Delivery, Received/Stored, Delivered and Package Reminder

- Provide full audit trail of package life cycle including: storage, transport and delivery of packages.

- Quickly clone repeat packages

- Real-time updates for package deliveries

- Generate a storage charge per day for holding packages

Product Specifications and Hardware Recommendations

- Unlimited Workstations per Server

- Recommended Barcode Scanner: Honeywell 1300G (AH-1091) or Honeywell Bluetooth Wireless Barcode Scanner (AH-1093)

- Recommended Label Printer: Dymo 450 Labelwriter (AH-1001)
