

PassagePoint **»»** HL7

Protect Your Hospital Against Security Threats While Maintaining an Open and Inviting Environment

PassagePoint HL7 is the most scalable healthcare visitor management solution available. Offering extensive customization, integrations and configuration capabilities designed to meet today's unique and complex healthcare security requirements.

PassagePoint HL7

PassagePoint HL7 is an easy-to-use, on-premise Healthcare Visitor Management System that will help you manage the security and safety of your Patients, Staff and Visitors. PassagePoint uses an HL7 Listener to receive real-time ADT messages from the Hospital's Patient information system. This can be utilized for Patient location look-ups, Patient restrictions, Outpatient appointments and managing Visitor limits in Patient rooms. PassagePoint HL7 has been successfully implemented in hundreds of hospitals and healthcare facilities to streamline the Visitor registration process.

5 Benefits of PassagePoint HL7:

- Comply with HIPAA policies
- Improve staff productivity
- Enhance hospital image
- Improve visitor satisfaction
- Control emergency response

PassagePoint™

HL7

Hospital demands are changing and extra effort is needed to anticipate and prepare for security threats. The hospital lobby is the first line of defense to proactively protect Patients, Visitors & Staff. PassagePoint HL7 provides a policy-based system so hospitals can create unique workflows for their specific environment.

- Extract Patient information and status in real-time using ADT (Admit/Discharge/Transfer) feed.
- Direct Visitors to the proper location (Building, Floor, Room # and Bed#) during the check-in process.
- Intellihint feature enables accurate Patient selection tied to HL7 patient location data.
- Add specific instructions re: banned visitors & patient restrictions for additional Patient security.
- Automatically track max number of Visitors allowed per room or bed & block additional Visitors when limit is reached.
- HIPAA-Compliant solution for Patient look-ups via desktop and self sign-in kiosk.
- Outpatients can be pre-populated in system for easy check in.
- Provide extended authorization for long-term Patient care.
- Track signed-in Visitors whereabouts via new 'tap-and-go' functionality.

Advanced Features and Benefits

- Run real-time searches against National Sex Offender Registry for added security in Maternity & NICU.
- Use Internal Watch Lists with automated notifications to flag unwanted Visitors and Patient visit restrictions.
- Seamless integration with leading Access Control Systems so visitors can be assigned temporary access credentials (card, barcode, QR code, RFID) during sign-in to limit access to specific Patient area.
- Multiple workflows allow you to manage not only Visitors, but Vendors and Contractors too.
- Custom badge designer allows for fully-branded design, as well as different badge designs by Visitor type.
- Convenient self-serve kiosks available to streamline the Visitor registration process.
- Web Pre-registration allows unlimited Staff and Patients to pre-register Visitors prior to visit.
- Mobile solutions available for Hospital Ambassador and Greeter sign-in options.

Hardware Options
