

# PassagePoint Vaccination Module

Part No. MA-VAC - Unlimited Workstations

## ***Easily Capture Visitor Proof of Vaccination or Negative COVID Test Results During Visitor Registration***

Managing visitors during the COVID-19 pandemic remains a significant challenge for many organizations. Businesses have been tasked with collection of contact tracing information, health survey questions, temperature checks and now, the latest requirement for tracking vaccination status.

This has been made easier than ever with PassagePoint's New Vaccination Module. Now during the sign-in process you can quickly and easily collect proof of vaccine or negative COVID test results for partially or non-vaccinated visitors.

- For vaccinated visitors, collect date of vaccine, type of vaccine and optional photo of the visitor's vaccination card. This information is stored as part of the visitor record and can be recalled for faster check-in during future visits, as well as auditing purposes.
- For partially or non-vaccinated visitors, collect negative COVID test results including test date with configurable setting for days to expiration which will deny future access if new test results are not presented.

## **Features & Benefits**

- Keep Employees and Visitors safe by ensuring all Visitors are vaccinated or have negative COVID test
- Adhere to facility requirements or Government mandates for tracking vaccination status
- Optional photo capture of vaccination card or negative COVID test results
- Generate vaccination report for auditing purposes
- Configurable based on category of Visitor
- Recall vaccination data for faster future sign-in
- Ability to block sign-in based on COVID test expiry
