Document and Image Scanner Perfect for Visitor Management Applications

Scan drivers' licenses, passports, 1D and 2D bar codes

The Thales QS2000 ID Scanner and Document Reader has the ability to read any passport, capture data from driving licenses, electronic travel and identity documents quickly and reliably, as well as read and transmit identification information into images.

The QS2000 combines three operations into one device, reading the MRZ (Machine Readable Zone) code found on any international passport, providing imaging capabilities to help keep a copy of identification on file, and reading 2D bar codes.

Features & Benefits

- Scan driver's licenses, IDs, and full page passports
- Complete access to OCR data and images captured via Software Development Kit (SDK)
- Enables images to be accessed as BMP, PNG or JPEG format
- Auto-triggering of document capture – presence of document is automatically detected
- Rugged design, no moving parts and internally sealed optical chamber to prevent dust ingress
- One-year manufacturers warranty

Specifications

Reads:

Drivers' licenses, passports, 1D and 2D barcodes

Dimensions & Weight:

7.3" Length, 6.0" Width, 5.2" Height

Weight 1.7lbs.

Power Supply:

Powered from a single USB 500mA port

Resolution:

400 DPI high-resolution visible imaging in 24-bit color

Included:

Special data Parser License required for use with PassagePoint
