

# PIV

Part No: MA-PIV

## Use United States Government Smart Cards to Process Visitors

PassagePoint’s integration with Codebench PIVCheck® provides a solid, three-step authentication process that is ideal for government visitor management applications.

## Features & Benefits

- Extracts cardholder data from any PIV, TWIC, FRAC or CAC card.
- Validates the cardholder’s PIN.
- Completes on-card biometrics matching.
- Digital certificates are verified using the issuer’s certificate authority, SCVP, OSCP responder/repeater or the TSA hot list (TWIC cardholders).
- All cards are validated using the FIPs-201 challenge-response protocol in order to identify forged or cloned cards.
- Perfect solution for US government agencies and contractors.

### Product Specifications
